

Situation Report

COVID-19 - Worldwide - 06-22-20 (Update 106) | (INC10276272)

Date As Of: 06/22/2020 01:27:40	Sitrep Update #: 106
Incident Start Time: 02/28/2020 Incident End Time: Ongoing	Incident Location: Worldwide
Impacted Sectors: Food and Agriculture, Healthcare and Public Health, Transportation Systems	Reported Cause of Incident: COVID-19
Interagency Coordination: Internal and external partners	On Scene Agencies: N/A
Owner/Operator(s) Involved: N/A	Source of Information: Centers for Disease Control and Prevention (CDC), World Health Organization (WHO), CISA Regions, FEMA

Incident Summary:

The Cybersecurity and Infrastructure Security Agency (CISA) continues to monitor the evolving Coronavirus Disease, also known as COVID-19, situation closely. CISA is taking part in interagency and industry coordination calls and working with critical infrastructure partners to prepare for possible disruptions to critical infrastructure that may stem from widespread illness.

FEMA reports approximately 8,242,999 (+301,208) cases and 445,535 (+10,739) deaths worldwide. In the U.S. there are approximately 2,248,029 (+115,708) cases and 119,615 (+2,753) deaths.

Key Points:

- FEMA deployed 2,520 (+4) employees in support of COVID-19 response
- 26,781,666 (+3,015,865) COVID-19 tests administered nationwide as of 21 JUN
- The WHO hopes "hundreds of millions" of doses of coronavirus vaccine can be produced this year and two billion doses by the end of 2021

CRITICAL INFRASTRUCTURE IMPACTS:

FOOD AND AGRICULTURE

The Centers for Disease Control and Prevention's (CDC) announced that the risk of getting COVID-19 from food you cook yourself or from handling and consuming food from restaurants and takeout or drive-thru meals is thought to be very low. Currently, there is no evidence that food is associated with spreading the virus that causes COVID-19.

Although some people who work in food production and processing facilities have gotten COVID-19, there is no evidence of the virus spreading to consumers through the food or packaging that workers in these facilities may have handled.

Cybersecurity and Infrastructure Security Agency Integrated Operations Division

The U.S. Department of Agriculture (USDA) approved Nebraska and South Carolina to operate the Pandemic-Electronic Benefit Transfer (P -EBT) program; there are now 43 States and two territories are operating the P-EBT programs.

HEALTHCARE AND PUBLIC HEALTH

Overall, indicators used to monitor COVID-19 activity are low nationally; however, small increases were seen in the percentage of specimens testing positive for SARS-CoV-2 and the percentage of visits for influenza-like illness (ILI) or COVID-19-like illness (CLI) in multiple parts of the country. Increases were reported in five U.S. Department of Health & Human Services (HHS) surveillance regions: North East, South East, South Central, Central, and Pacific Northwest.

Mortality attributed to COVID-19 decreased compared to last week but remains elevated above baseline and may increase as additional death certificates are processed.

The White Mountain Apache Tribe in Arizona reports over 1,300 cases in a population of 12,000, approximately 11 percent. Increasing testing capacities remains top priority and the Tribe is working with Indian Health Service and Bureau of Indian Affairs to identify and refine strategies.

The World Health Organization (WHO) hopes "hundreds of millions" of doses of coronavirus vaccine can be produced this year and two billion doses by the end of 2021.

TRANSPORTATION SYSTEMS

The U.S. Department of Transportation (DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA) has developed a Safety Advisory Notice to provide information on the Hazardous Materials Regulations (HMR) related to offering and transporting COVID-19 diagnostic samples (e.g., nasal swabs, vials of sputum, and other related items).

Cross-border activity between the State of Washington and Canada is increasing; restrictions for non-essential workers has been extended to 21 JUL.

ACTIVATIONS AND DECLARATIONS

The CDC recommends travelers avoid all nonessential travel to the following destinations: Brazil, China, Iran, Most European Countries, United Kingdom and Ireland. Most foreign nationals who have been in one of these countries during the previous 14 days will not be allowed to enter the United States.

Five states / territories have stay at home orders in place; 37 states/territories have lifted their stay at home orders, though may have other movement restrictions; four states lifted state-wide orders, but maintain regional stay at home orders; three have not issued state-wide stay at home orders and have lifted all regional orders; and seven states never enacted stay at home orders.

The Governor of Arkansas extended the state's public health emergency for another 45 days.

Cybersecurity and Infrastructure Security Agency
Integrated Operations Division

The Department of Health in California will now require approximately 40 million residents to cover their faces in "most settings outside the home," due to reported record-high new coronavirus infections.

Colorado's Stay at home orders in all regions have been lifted.

The Governor of Michigan extended the state of emergency declaration until 16 JUL.
